Product Overview

High-Performance Mining Loader

This 8-ton front wheel loader is engineered for demanding mining and heavy-duty construction applications. Featuring a powerful turbocharged engine and a highly efficient hydraulic system, it provides exceptional traction and rapid hydraulic response. Its design focuses on low fuel consumption, reduced emissions, and operator comfort, ensuring maximum productivity in challenging work environments.

Technical Specifications

Rated Capacity	8000 kg
Bucket Volume	4.5 m3

Engine Performance

Emission Standard

Tier 3

Engine Model

Cummins QSM11

Key Features

Operational Efficiency

- Air-air inter-cooled system
- Pilot control hydraulic system
- Steering flow amplifying technology
- Working and steering confluence technology
