

8-Ton Truck Mounted Crane with Telescopic Boom

This truck-mounted crane has a lifting capacity of 8 tons and a telescopic boom for extended reach. The hydraulic system allows for smooth and efficient operation, while the sturdy chassis ensures stability on various terrains.

Overview

Versatile 8-Ton Lifting Solution

The SQS200-4 is a robust and versatile truck-mounted crane engineered for demanding heavy lifting and construction applications. It features a telescopic boom design that allows for extended reach and precise load placement across various job sites. With a powerful hydraulic system and high-capacity lifting performance, it is an ideal solution for infrastructure projects and industrial material handling.

Technical Specifications

Max Lifting Capacity	8000 kg
Max Lifting Moment	20 T.M
Crane Unit Weight	3315 kg
Rotation Capability	360-degree all rotation

Hydraulic System

Hydraulic Performance

55 L/min

Max Oil Flow

27 Mpa

Max System Pressure

160 L

Oil Tank Capacity

Installation

Recommended Power	27 kw
Required Installation Space	1200 mm
