

8 x 1/2 x 1-1/4 Inch Grinding Wheel

This grinding wheel has an 8-inch diameter, a 1/2-inch thickness, and a 1-1/4 inch arbor hole. It is constructed with 9A46 abrasive grain for efficient material removal and a consistent finish.

Product Overview

High-Performance White Aluminum Oxide Grinding Wheel

This precision-engineered grinding wheel is crafted from premium White Aluminum Oxide, designed specifically for high-hardness applications including high-speed steel, high-carbon steel, hardened steel, and alloy steel. Measuring 8 inches in diameter with a 1/2-inch thickness and a 1-1/4 inch arbor hole, it provides efficient material removal and a consistent finish. Suitable for sharpening, shaping, and deburring, this wheel is a reliable choice for demanding industrial grinding tasks.

Technical Dimensions

Diameter	8 inch
Thickness	0.5 inch
Arbor Hole	1.25 inch

Material & Compatibility

Abrasive Material	White Aluminum Oxide
Compatible Materials	High-Speed Steel, High-Carbon Steel, Hardened Steel, Alloy Steel
Abrasive Grain	9A46

Application & Customization

Common Applications

- Sharpening
- Shaping
- Deburring

Available Wheel Shapes

Parallel Cup • Cup • Cylinder

Customization	Yes
