Overview

High-Efficiency Power Delivery

This high-performance power supply unit is engineered to deliver stable and efficient energy to demanding computing systems, including gaming rigs and professional workstations. Featuring 80 PLUS Gold certification, it ensures optimal energy conversion and reliability under load. With a versatile range of wattage options from 500W to 800W, this unit is designed to meet the diverse power requirements of modern hardware configurations.

Performance Metrics

Available Wattage

- 500W
- 600W
- 700W
- 800W

Efficiency Rating

80 PLUS Gold

Electrical Specifications

Input Voltage Range	100-240Vac
Power Factor Correction	Active PFC

Safety & Protection

Safety Protections	OVP (Over-Voltage), OCP (Over-Current), SCP (Short-Circuit), OTP (Over-Temperature)
