

8000kg Capacity Round Sling

This round sling is designed for heavy lifting applications. Constructed from durable synthetic fibers and encased in a protective sleeve, it offers a working load limit of 8000kg and provides secure, reliable performance.

Product Overview

High-Capacity Synthetic Lifting Solution

This 8000kg capacity round sling is engineered for heavy-duty lifting applications, utilizing high-strength synthetic fibers to ensure maximum reliability. Its pliable, flexible design allows it to adapt to load contours, protecting both the item being lifted and the sling itself from surface damage. The durable polyester jacket acts as a shield against mildew, rot, moisture, and environmental degradation, ensuring a long service life even in demanding work environments.

Technical Specifications

Working Load Limit

8000 kg

Capacity

Material Benefits

- Moisture resistant (does not absorb water)
- Resistant to mildew and rot
- Protective jacket against dirt and grease
- UV degradation protection
- Abrasion resistance

Application

Key Advantages

Highly Pliable • Surface Protection • Versatile Lifting • Durable Construction

Compatible Hitch Configurations

Vertical, Choker, Basket
