

# 800lb Forged Steel Socket Weld Gate Valve

This is an 800lb gate valve with socket weld connections. It is constructed from forged steel for strength and reliability in demanding industrial environments.

## Product Overview

### High-Pressure Forged Steel Gate Valve

This 800lb forged steel socket weld (SW) gate valve is engineered for demanding industrial environments requiring high-pressure durability. Constructed from robust forged steel, the design ensures structural integrity and long-term reliability in critical pipeline systems. Its socket weld connections provide a secure, leak-proof seal, making it an ideal choice for the precise control of liquids and gases.

## Technical Specifications

### Pressure Rating

**800 lb**

Pressure Class

### Connection Type

Socket Weld

### Material

Forged Steel (A105)

### Application Compatibility

Liquid Service, Gas Service, High Pressure
