

800W Automatic Water Pump

This automatic water pump is powered by an 800W motor and operates on a single-phase 230V/50Hz power supply. It is designed for water supply, irrigation, and drainage applications, with a maximum flow rate of 4500L/h.

Overview

High-Efficiency Automatic Water Pump

This 800W automatic water pump is designed for reliable water supply, irrigation, and drainage applications. Featuring an integrated LCD indicator and electronic control panel, it provides seamless automatic operation once electrified. The system includes adjustable starting pressure settings, allowing for customized performance tailored to specific installation requirements.

Performance Metrics

Rated Power

800 W

Motor Power

Max Flow Rate	4500 L/h
Total Lift	40 m
Max Suction Height	7 m

Technical Specifications

Power Requirements	Single Phase AC 230V/50Hz
Pipeline Connection	G13
Operating Temperature Range	0^50

Control & Features

Adjustable Starting Pressure	1-3 bar
Control Features	Automatic Operation, LCD Indicator, Electronic Control
