

800W Variable Speed Jigsaw

This 800W jigsaw is a versatile power tool designed for precise cutting of various materials. Its powerful motor delivers high cutting performance for both straight and curved cuts, while the adjustable base allows for bevel cuts up to 45 degrees.

Overview

High-Performance Cutting Precision

This 800W variable speed jigsaw is engineered for versatility and control, making it an essential tool for woodworking and professional applications. It features a robust copper motor and adjustable speed settings to ensure optimal performance across a variety of materials. With integrated convenience features like laser guidance, LED lighting, and a quick-change blade system, this tool is designed to enhance efficiency and maintain a clean workspace.

Technical Specifications

Power Output

800 W

Motor Power

230 V

Voltage

Performance Metrics

Metric	Value
No Load Speed	800-3000 rpm
Stroke Length	23 mm
Max Cutting Capacity	100 mm

Features & Capabilities

Integrated Tools

- Laser Guide
- LED Work Light
- Blower Function
- Dust Extraction Port

Key Cutting Features

Variable Speed, Pendulum Function, Quick Change Blade, Bevel Cutting

Bevel Angle Range

-45° to +45°

Construction

Build Materials

Copper Motor • Aluminum Base • Aluminum Shoes
