

80W E27/B22 LED Light Bulb

This 80W LED light bulb is designed for home lighting applications. It features PC+AL construction for efficient heat dissipation and utilizes SMD LED technology for enhanced brightness.

Product Overview

High-Efficiency 80W LED Lighting Solution

This high-power LED bulb is engineered for superior brightness and energy efficiency in home lighting applications. Built with a durable PC+AL construction, it ensures efficient heat dissipation for a longer operational lifespan. Utilizing advanced SMD technology, it delivers over 5000 lumens of uniform, clear illumination, making it an ideal choice for spaces requiring robust lighting performance.

Technical Specifications

Luminous Flux

5000 Lm
Brightness

Model Number	DP-QPG80C
Power Rating	80 W
Compatible Bases	E27, B22
Construction Material	PC+AL (Polycarbonate + Aluminum)
Technology	SMD (Surface Mount Device) LED

Features

Key Benefits

- Energy-saving design
- Efficient heat dissipation
- High brightness output
- Environmentally friendly
