Product Overview

Integrated Solar Lighting Solution

This multi-functional integrated solar garden light combines solar energy, an LED light source, and a lithium battery into one ultra-thin, concise design. It features an intelligent microwave induction system that automatically manages lighting cycles, switching on at night and off during the day. Designed for energy efficiency and low maintenance, it provides high brightness and easy installation for various outdoor environments.

Technical Specifications

Lighting Features

- Intelligent microwave induction system
- Automatic day/night switching
- Motion-activated brightness control
- Energy saving mode
