

84-Inch Surveillance Monitor

This 84-inch monitor features a sandblast effect inside the cabinet and a pure black fuselage. The hardware-reinforced monitor has an aluminum frame for a firm and elegant appearance.

Overview

Professional Surveillance Display

This 84-inch surveillance monitor is engineered for high-demand security environments, offering a massive 3840x2160 resolution for crystal-clear situational awareness. Designed for reliability, the unit features a reinforced aluminium alloy frame and an integrated industrial cooling fan to support continuous 24/7 operation. With versatile connectivity options and wide viewing angles, it is an ideal solution for control rooms and public safety centers requiring precision monitoring.

Display Performance

Brightness

350 cd/m2

Brightness

Resolution	3840 x 2160
Viewing Angle	H:178°, V:178°
Contrast Ratio	1600:1
Response Time	8 ms
Color Depth	1.06 Billion Colors

Physical Specifications

Viewable Area	1860.48mm (H) x 1046.52mm (V)
Frame Material	High light aluminium alloy, reinforced
Cooling System	Yes

Connectivity & Power

Interfaces	HDMI, VGA, BNC-IN, BNC-OUT, CVBS, AUDIO
Max Power Consumption	500 W
Standby Power	1 W
Input Voltage	100Vac - 240Vac

Environmental

Operating Conditions

Parameter	Range
Working Temperature	0°C to 40°C
Working Humidity	10% to 90%
Storage Temperature	-10°C to 55°C
