

84kW Vertical AC Charging Station with Advertising Display

This 84kW vertical AC charging station offers simple operation via card swipe or QR code scanning. It provides automatic, quantitative, timing, and pricing-based charging options.

Overview

High-Capacity Charging with Integrated Advertising

This 84kW vertical AC charging station is designed for high-efficiency electric vehicle charging in public and commercial spaces. Featuring a 4.3-inch color touch screen and an integrated advertising display, it combines utility with marketing potential. The unit supports versatile payment methods including mobile apps and card systems, ensuring a seamless user experience.

Performance Metrics

Rated Output Power

84 kW

Total Power

42 kW

Power per Port

Output Current Range

0-63A per port

Electrical Specifications

Input/Output Voltage

AC220V \pm 20%

Input Frequency

50 Hz

Safety & Durability

Protection Grade

IP54

Leakage Protection

\leq 30mA (Action time \leq 0.1s)

Connectivity & Interface

Display

4.3-inch bright color touch screen

Communication Interfaces

Ethernet, CAN, RS485, GPRS, 3G, 4G

Operational Features

Payment Methods

- Mobile App
- Credit Card
- WeChat Pay
- Alipay

Charging Functions

- Automatic charging
- Quantitative charging
- Timing charging
- Pricing charging
