Overview

Designed for the Last Kilometer

This 8.5-inch electric commuter scooter features a streamlined, sports-car-inspired design that combines aesthetics with practical engineering. With a unique battery-in-lever design, it offers superior passability and water resistance (IP54) compared to traditional under-pedal battery configurations. Built for convenience, it includes a quick-folding mechanism, removable grips, and a robust aluminum frame, making it an ideal solution for urban commuting.
