Overview

High-Performance Telescopic Wheel Loader

The 850T telescopic wheel loader is engineered for versatility and high performance in construction, landscaping, and agricultural environments. Featuring a telescopic lift frame design, it offers extended reach and superior lifting height compared to standard models. With an advanced ergonomic cabin and hydrostatic transmission, this machine ensures operator comfort and precise control for demanding material handling tasks.

Technical Specifications

Transmission System	Hydrostatic
Lift Design	Telescopic

Key Features

Engine Origin

Imported from Japan

Maintenance Highlights

- Overturnable hood design
- Convenient maintenance access

Operator Environment

Safety Guard, Ergonomic Design, Comfortable Cab

Operational Capabilities

Performance Highlights

1 Yes

Telescopic Lift

Attachment System

Quick change system
