

850W 115mm Angle Grinder

This angle grinder is designed for grinding, cutting, and polishing various materials. It features a robust motor, durable construction, and a compact design for easy handling.

Product Overview

Professional Performance

This 850W angle grinder is designed for versatility and precision in demanding environments. Engineered for grinding, cutting, and polishing tasks, it combines a robust motor with a compact, ergonomic form factor to ensure reliable performance. Its durable construction makes it an ideal solution for metalworking, construction, and general maintenance applications.

Technical Specifications

Rated Power

850 W

Power Input

Disc Diameter

115 mm

Model Identifier

S1M-ZP83-115

Features

Design Highlights

- Compact design for easy handling
- Enhanced maneuverability
- Integrated safety features
- Robust motor construction

Suitable Applications

Metalworking, Construction, Cutting, Grinding, Polishing
