

850W Reciprocating Saw for Wood and Metal

This 850-watt reciprocating saw is a versatile tool for cutting through wood, metal, and plastic. Its ergonomic design ensures comfortable handling, while the tool-free blade change system allows for quick blade replacements.

Overview

Professional Performance and Versatility

This 850W reciprocating saw is engineered for demanding cutting tasks across wood, metal, and plastic materials. Featuring a high-performance copper motor and a 0-2800rpm variable speed range, it delivers the power and control necessary for demolition, remodeling, and general construction work. Designed with user comfort and efficiency in mind, it includes a rotary handle, integrated LED lighting, and a tool-free blade change system to maximize productivity on the job site.

Technical Specifications

Rated Power

850 W

Power Rating

Motor Construction	Copper winding
Voltage/Frequency	230-240V / 50Hz

Performance

No Load Speed	2800 rpm
Max Cutting Depth	28 mm

Design & Features

Key Features	Rotary Handle, LED Work Light, Tool-free Blade Change, Pivoting Shoe
Cable Length	2 m

Included Accessories

Package Contents

- 1 pc 150mm Wood Cutting Blade
