

# 85W Three-Blade Ceiling Fan with Regulator

This ceiling fan operates at 220V and 85W, providing efficient air circulation. It features a 5-speed regulator to adjust the airflow.

## Overview

### High-Efficiency Ceiling Fan

This 56-inch three-blade ceiling fan is engineered for reliable air circulation in professional or commercial environments. Constructed from durable iron, it features an 85W motor capable of reaching 280 R.P.M. for consistent performance. The included 5-speed regulator provides precise control over airflow, making it a versatile cooling solution.

## Technical Specifications

Power Rating	85 W
Voltage	220 V
Frequency	50 Hz
Rotational Speed	280 R.P.M.
Temperature Rise	90 K
Motor Dimensions	116x10.4mm

## Design & Dimensions

### Component Dimensions

Component	Measurement
Central Housing Diameter	225mm
Housing Height	75mm
Blade Length	580mm
Blade Width	136mm

Fan Size	56 inch
Construction Material	Iron
Blade Angle	8 degrees

## Performance Features

### Performance Highlights

<b>85 W</b> Power Consumption	<b>280 R.P.M.</b> Max Speed	<b>5 levels</b> Speed Settings
Control Method	5-Speed Regulator
