Overview

Versatile 8kW Diesel Power Solution

The HH1105FE is a robust single-cylinder, air-cooled four-stroke diesel engine designed for high efficiency and reliability. Engineered for ease of use with a key start system, it features a large fuel tank for extended continuous operation and low fuel consumption. This compact engine is an economical choice for a wide range of applications including agricultural machinery, engineering projects, and emergency power backup for families or shopping malls.

Technical Specifications

Start Mode

Key Start

Engine Type

Single-cylinder, air-cooled, four-stroke

Model Reference

HH1105FE / PF1105F

Injection System

Direct injection for optimal combustion

Applications

Recommended Applications

Agriculture, Generators, Water Pumps, Engineering, Family Backup, Shopping Malls

Key Features

Operational Advantages

- Easy to start mechanism
- Large capacity fuel tank for long runtimes
- Low fuel consumption for economical operation
- Simple maintenance requirements
- Durable construction with protective fan guard
