

8mm Component Feeder for Pick and Place Machines

This precision component feeder is designed for pick and place machines. The 8mm feeder ensures accurate and reliable feeding of electronic components, optimizing the assembly process.

Product Overview

Precision Assembly Feeding Solution

This high-performance component feeder is engineered for seamless integration with industrial pick and place systems. It provides reliable and accurate component delivery for electronic assembly lines, significantly optimizing production throughput. Built for durability, it supports consistent performance in high-speed manufacturing environments.

Technical Specifications

Available Feeder Options

- 8mm
- 8 * 2mm
- 8 * 4mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm

Feeder Type

Electric Feeder • Pick and Place Accessory

Feeder Width

8 mm
