Product Overview

High-Performance Fuel Line Assembly

This 8mm fuel line assembly is engineered for reliable fuel delivery in marine and automotive environments. Featuring a durable, oil-resistant rubber construction, the kit includes an integrated hand primer bulb to prevent fuel backflow and ensure consistent supply. Designed for quick and easy installation, it serves as an efficient aftermarket replacement for various outboard engine systems.

Technical Specifications

Inner Diameter	8 mm
Overall Length	195 cm
Materials	Rubber, Metal

Performance Features

Key Benefits

- Oil-proof and air-proof rubber construction
- Integrated hand primer bulb for system priming
- One-way valve prevents fuel return to tank
- Directional flow arrow marked on body
- Corrosion-resistant fittings

Compatibility

Supported Engine Range

4 hp

Min HP

200 hp

Max HP

Compatibility Warning

This assembly is intended for engines supporting external fuel tanks. Please note that some newer models (60 hp and above) may not support external fuel tanks, rendering these lines unsuitable for those specific applications.
