

8mm SMT Feeder for Fuji NXT Pick and Place Machines

This 8mm SMT feeder is designed for Fuji NXT series pick and place machines. It ensures accurate and reliable component feeding for high-speed surface mount technology assembly.

Product Overview

Precision 8mm SMT Feeder

This 8mm SMT feeder is engineered specifically for high-speed pick and place systems, ensuring consistent and accurate component delivery. Designed for robust operation in industrial assembly environments, it supports long-term performance with minimal maintenance needs. It is compatible with a wide range of feeder widths to support diverse manufacturing requirements.

Technical Specifications

Feeder Width	8 mm
Model Identifier	KT8BC 086351

Compatibility

Supported Tape Widths

- 8
- 12
- 16
- 24
- 32
- 44
- 56
- 72
- 88

Compatible Systems	Fuji NXT, Fuji XPF
--------------------	--------------------

Support Equipment

Available Accessories

Component
Feeder Motor
Control Board
Power Cord
Trolley
Calibrator
