

8mm Tape Feeder for SMT Pick-and-Place Machines

This 8mm tape feeder ensures reliable and accurate delivery of components during automated assembly. Its robust construction and precise alignment mechanisms provide consistent performance in demanding industrial environments.

Product Overview

Precision 8mm Component Feeding

This high-precision 8mm tape feeder is designed for optimal performance in automated pick-and-place assembly processes. Engineered for reliability and durability, it ensures accurate delivery of components to maintain consistent high-speed operation. It is fully compatible with advanced modular surface mount technology platforms, providing a robust solution for demanding production environments.

Technical Specifications

Tape Width	8 mm
Machine Compatibility	NXT, AIM, XPF
Part Number	UF0990
Internal Reference ID	KT080 197487
