Overview

Smart Energy-Efficient Lighting

This 8W LED ceiling light features an integrated motion sensor designed for automatic on/off functionality, providing light only when movement is detected. Its durable iron and polycarbonate construction ensures long-lasting performance while maintaining a modern, low-profile aesthetic. Ideal for various indoor spaces, it offers uniform illumination and significant energy savings through intelligent automation.

Performance

Technical Highlights

8 W

Power Consumption

640 lm

Luminous Flux

Efficiency Rating

Energy Efficient • Motion Activated

Electrical Specifications

Input Voltage Range

AC 100-250V

Physical Dimensions

Product Size

Dimension	Measurement
Diameter	220 mm
Height	48 mm

Material & Build

Materials Used

Iron, PC (Polycarbonate)

Smart Features

Sensor Features

- Integrated motion sensor
- Automatic on/off functionality
- Movement-based activation
- Uniform light distribution
