

9 HP Diesel Power Tiller Cultivator

This 9 HP diesel power tiller cultivator is a robust machine designed for soil preparation. It is suitable for tilling, plowing, and cultivating various soil types.

Overview

Versatile Agricultural Cultivation

This 9 HP diesel power tiller is a robust machine engineered for diverse agricultural tasks, including rototilling in drylands and paddy fields. Its multi-functional design supports essential operations such as pumping, transportation, threshing, ditching, and pesticide spraying. Ideally suited for hills, mountains, greenhouses, and orchards, it provides the reliability needed for varied geographical and agronomic requirements.

Engine Specifications

Engine Model	KM186F
Engine Displacement	406 cc
Engine Type	Diesel, 4-stroke, Air-cooled

Performance Metrics

Power Output

9 hp Max Output	8.6 hp Rated Power
---------------------------	------------------------------

Fuel Consumption	d0.6kg/666.7j
Rotary Tilling Productivity	666.7-1333.4 j/h

Tilling Capabilities

Tilling Dimensions

Parameter	Value
Tilling Depth	12-30 cm
Tilling Width	105 cm
Blade Diameter	35 cm
Narrowest Blade Distance	30 cm

Physical Dimensions

Overall Dimensions (LxWxH)	180cm x 135cm x 110cm
Wheelbase	50 cm
