Product Overview

Heavy-Duty Performance

This 9-inch angle grinder is engineered for demanding professional applications, featuring a robust 2600W motor that provides exceptional power for cutting and grinding tasks. Designed with longevity in mind, it incorporates advanced dustproofing and anti-oil leakage structures to protect internal components. The tool also includes a soft-start function to ensure smooth operation and enhanced control during heavy-duty use.

Technical Specifications

Rated Power

2600 W
Rated Power

4000 W
Overload Capacity

Disc Diameter

230 mm

Disc Size

9-inch

Key Features

Durability Technologies

- Labyrinth dustproof design on bearing block
- Effective coating for dust protection
- Anti-oil leakage O-ring structure

Operational Features

Soft Start, High Overload Capacity, Heavy-Duty Design
