

# 9-Inch 2600W Angle Grinder for Cutting and Grinding

This 9-inch angle grinder is equipped with a 2600W motor for high performance in cutting and grinding applications. It is designed for use on metal, stone, concrete, and other materials.

## ADDITIONAL IMAGES

## Overview

### Professional Performance

This 9-inch angle grinder is engineered for heavy-duty cutting and grinding tasks in demanding industrial environments. Featuring a robust 2600W motor with an impressive 4000W overload capacity, it delivers sustained power for professional metalworking and construction applications. The tool incorporates advanced dust protection and sealing technologies to ensure longevity and consistent performance under rigorous use.

## Technical Specifications

Rated Power	2600 W
Overload Ability	4000 W
Disc Diameter	9 inch

## Design & Durability

### Durability Features

- Labyrinth dustproof design of bearing block
- Effective coating for motor dust protection
- Anti-oil leakage O-ring structure for gear protection

Model Number	CT13489-230
