Product Overview

Professional 5-Wire Roller Frame

This 9-inch roller frame features a robust 5-wire cage design, specifically engineered to minimize cover slippage and ensure consistent, even pressure distribution during paint application. Constructed with a durable chrome-plated steel frame, it is built for long-lasting performance and easy cleanup. The ergonomic, bi-material handle provides a secure, non-slip grip, significantly reducing user fatigue during extended painting projects.

Technical Specifications

Compatible Roller Size	9 in
Metric Size	228 mm
Cage Construction	5-wire cage

Features

Key Features

- 5-wire cage design for reduced slippage
- Threaded end for extension pole compatibility
- Non-slip bi-material handle
- Chrome-plated steel construction
