

# 9 inch Abrasive Grinding Wheel for Metal

This 9-inch grinding wheel is designed for metalworking applications. It features a 230x6.0x22.2mm dimension and is suitable for use on steel, stainless steel, and other metals.

## Product Overview

### High-Performance Abrasive Grinding Wheel

This 9-inch abrasive grinding wheel is engineered for demanding metalworking environments, offering high durability and efficient material removal. Designed for steel, stainless steel, and various alloys, it features a reinforced construction that ensures both safety and consistent performance. Compliant with international safety standards, this disc is an essential tool for industrial grinding and cutting applications.

## Technical Specifications

Reinforced construction designed for heavy-duty metal grinding applications.

Dimensions	230 x 6.0 x 22.2 mm
Maximum RPM	6600 RPM
Maximum Operating Speed	80 m/s
Abrasive Specification	A 24 Q4 BF

## Compliance & Quality

Certifications	ISO 9001, MPA Z-04889, EN 12413
----------------	---------------------------------

## Applications

### Compatible Materials

- Steel
- Stainless Steel
- General Metal Alloys

## Performance Features

### Key Performance Features

Reinforced Structure • High Durability • Industrial Grade • High Security
