Product Overview

High-Performance Cutting Solution

This 9-inch flat cutting wheel is engineered for superior performance in metal cutting applications. Designed as a Type T41 wheel, it offers a stable and precise cutting experience for industrial tasks. The disc is built to meet rigorous safety and quality standards, ensuring reliability for professional steel cutting operations.

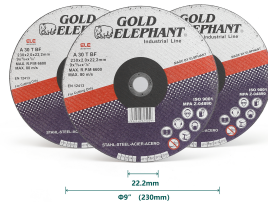

Wheel Type

T41 (Flat Wheel)

Technical Specifications

REINFORCED SUPER-THIN CUTTING DISCS

Ø9" (230mm)

Reinforced super-thin cutting disc designed for efficient steel and metal cutting applications.

Dimensions

Parameter	Value
Diameter	230 mm (9 inch)
Thickness	2.0 mm
Bore Size	22.2 mm

Performance Metrics

6600 RPM

Max RPM

80 m/s

Max Speed

Application & Usage

Suitable Materials

Steel, Metal

Compliance & Safety

Certifications & Standards

ISO 9001 • MPA Z-04890 • EN 12413
