

9-Inch Polymer Torpedo Level

This 9-inch torpedo level is a compact tool for leveling and alignment. Its durable polymer body withstands impact and wear, making it suitable for demanding job sites.

Overview

Compact Precision Leveling

The 9-inch torpedo level is a compact and versatile measuring tool designed for various leveling and alignment tasks. Constructed with a durable polymer body, it offers excellent resistance to impact and wear, making it suitable for demanding job site conditions. Its compact design ensures easy storage and maneuverability in tight spaces, making it an essential tool for construction, carpentry, and plumbing professionals.

Technical Specifications

Vial Configuration

- Horizontal (Level)
- Vertical (Plumb)
- 45-degree angle

Length	9 inch
Body Material	Polymer
Key Features	Impact Resistant, Compact Design, Wear Resistant, Versatile

Applications

Common Applications

Construction • Carpentry • Plumbing
