

900W Electric Tarp Motor for Dump Trucks

This 900W electric motor is designed for dump truck tarp systems. It features a 90:1 gear ratio for optimal torque and reliable tarp deployment.

Overview

High-Performance Tarp Motor

This 900W electric motor is engineered specifically for dump truck tarp systems, delivering reliable power for smooth deployment and retraction. Featuring a robust 90:1 gear ratio, it provides the necessary torque for demanding heavy-duty operations. Built with durable components, this motor is designed to enhance productivity and safety in challenging work environments.

Technical Specifications

Power Output	900 W
Gear Ratio	90:1
Output Shaft Dimensions	3 1/8" x 3/4"
Model Number	3995

Features

Included Components

- Chrome cover

Compatibility

Compatibility

Standard Dump Truck Tarp Systems • High-Torque Applications
