

97-100 mm Hydraulic Anchor Windlass

This hydraulic anchor windlass is designed for 97/100 chains. It delivers efficient and controlled anchor deployment and retrieval.

Product Overview

Heavy-Duty Hydraulic Anchor Windlass

This hydraulic anchor windlass is engineered for demanding marine environments, providing reliable and efficient anchor deployment and retrieval. Designed for large-scale maritime operations, it features robust construction to ensure durability and longevity under harsh conditions. The system comes equipped with a dedicated hydraulic power unit and control system for seamless and precise operation.

Technical Specifications

Working Load

446.9 kN

Working Load (97mm)

475 kN

Working Load (100mm)

Supporting Load

2995 kN

Supporting Load (97mm)

3162 kN

Supporting Load (100mm)

Chain Diameter	97 mm
Warping Load	250 kN
Hydraulic Power	150 kW

Certifications

Authorized Classification Societies	CCS, LR, GL, RS
