

9V 1.5A Power Adapter

This power adapter provides a regulated 9V DC output at 1.5A. It features built-in safety electronics such as over-current, over-temperature, over-voltage, and short circuit protection.

Product Overview

Reliable Power Solution

This versatile power adapter is engineered for consistent performance and safety in various professional applications. Featuring a wide input voltage range and a robust design, it ensures stable power delivery for your critical equipment. The unit includes comprehensive safety protections, making it a dependable choice for long-term use.

Electrical Specifications

Output Performance

9 V Output Voltage	1.5 A Output Current
------------------------------	--------------------------------

Input Voltage Range: 100-240V AC

Input Frequency: 50/60Hz

Physical Characteristics

Cable Length: 8.2 ft

Safety & Compliance

Certifications

UL Listed • FCC Certified • ETL Listed • RoHS Compliant

Technical Standards

- IC Control
- Isolating Transformer
- Reinforced Outer Shell

Protection Mechanisms

Over-Current Protection, Over-Temperature Protection, Over-Voltage Protection, Short Circuit Protection
