Product Overview

High-Performance Rechargeable Power

This 14500-sized lithium iron battery offers a reliable and sustainable power solution for electronic devices requiring consistent voltage. Designed for longevity, these batteries can be recharged over 1000 times, providing an economical alternative to single-use dry cells. For optimal performance and safety, this battery is engineered to be used in conjunction with a compatible lithium battery companion.

Technical Specifications

Battery Chemistry	Lithium Iron
Form Factor	14500 / AA
Nominal Voltage	3.2 V
Capacity	650 mAh

Performance & Usage

Cycle Life

1000 +
Recharge Cycles

Usage Requirements

- Requires compatible lithium battery companion
- Suitable for constant power discharge appliances
- Do not heat or decompose

Compliance & Safety

Certifications	ISO 9001, ISO 14001
