

AA 8.4V 1800mAh Ni-MH Rechargeable Battery Pack

This nickel-metal hydride (Ni-MH) rechargeable battery pack features a nominal voltage of 8.4V and a capacity of 1800mAh. It provides a reliable power source for devices requiring high energy density and is equipped with a connector for easy integration.

Product Overview

Reliable Power Solution

This 8.4V Ni-MH rechargeable battery pack is engineered to provide consistent and reliable power for demanding electronic applications. Featuring a robust 1800mAh capacity, it utilizes a 7-cell AA configuration to deliver high energy density in a compact form factor. Designed for seamless integration, the pack comes equipped with a standard connector for easy installation into compatible devices.

Technical Specifications

Nominal Voltage	8.4 V
Capacity	1800 mAh
Battery Chemistry	Ni-MH (Nickel-Metal Hydride)
Cell Configuration	7x AA cells in series

Safety & Compliance

Safety Warnings

- Do not dispose of in fire
- Handle with care
- Rechargeable
