

# AA AAA Ni-MH Ni-Cd Battery Charger

This battery charger is designed for charging AA and AAA Ni-MH and Ni-Cd rechargeable batteries. It features four independent charging channels and LED indicators to display the charging status for each battery.

## Product Overview

### Versatile Battery Charging Solution

This universal battery charger is designed to accommodate both AA and AAA Ni-MH and Ni-Cd rechargeable batteries. Featuring four independent charging channels, it offers the flexibility to charge between one and four batteries simultaneously with individual status monitoring. Built-in safety protocols, including overcharge, short circuit, and reverse polarity protection, ensure reliable and efficient performance for both home and travel applications.

## Technical Specifications

Input Voltage	AC 100-240V
Input Frequency	50/60Hz
Output Voltage	1.48 V

## Performance Metrics

### Charging Current

<b>400 mA</b> AA Charging Current	<b>200 mA</b> AAA Charging Current
--------------------------------------	---------------------------------------

## Features & Safety

Safety Protections	Overcharge Protection, Short Circuit Protection, Reverse Polarity Protection
Charging Channels	4
Status Indicators	Yes

## Compatibility

### Supported Battery Types

- AA Ni-MH
- AAA Ni-MH
- AA Ni-Cd
- AAA Ni-Cd
