

AA Alkaline Battery LR6 AM-3 1.5V

This LR6 AM-3 AA alkaline battery delivers 1.5V of power. The battery is designed for long-lasting performance in various devices.

Product Overview

High-Performance Alkaline Power

These LR6 AM-3 1.5V alkaline manganese dioxide batteries are engineered for reliable, long-lasting performance in a variety of electronic devices. Designed with environmental safety in mind, they contain no mercury or chromium. They are built to meet rigorous international standards, ensuring consistent power output for both high and low-drain applications.

Technical Specifications

Chemical System	Zn-MnO ₂ (KOH)
Nominal Voltage	1.5 V
Compatible Designations	IEC: LR6, ANSI: AA, JIS: AM-3, 24A, E91
Operating Temperature Range	-20°C to +60°C

Performance Metrics

Discharging Capacity

2200 mAh

Capacity

Approximate Weight	22 g
--------------------	------

Compliance & Standards

Reference Standards

- GB/T8897.1 (IEC60086-1)
- GB/T8897.2 (IEC60086-2)
- GB8897.5 (IEC 60086-5)

Environmental Compliance

EU 2006/66/EC Compliant • Mercury-Free • Chromium-Free

Performance Data

Discharging Performance

Load	End-point Voltage	2 Months New (h)	12 Months Storage (h)
43Ⓢ	0.9V	85	78
3.9Ⓢ	0.8V	6.5	6
24Ⓢ	1.0V	40	36
