Product Overview

Innovative USB Rechargeable Power

This AA lithium-ion battery integrates a built-in USB charging port, eliminating the need for bulky external chargers. With a rapid one-hour full charge cycle, it is engineered to support a fast-paced lifestyle while offering up to 1,000 charge cycles per unit. These eco-friendly batteries replace traditional disposable cells, providing a sustainable, cost-effective, and leakage-proof energy solution.

Technical Specifications

Voltage	1.5 V
Capacity	1500 mWh
Service Life	1000 cycles
Charging Time	1 hour

Key Features

Advantages

- Integrated USB charging interface
- Rapid charging technology
- Leakage-proof construction
- Sustainable eco-friendly design
- High energy density

Safety Standards

Leakage-proof, Overload protection, Integrated chip management
