

# AA80 Abrasive Sheet for Metal Grinding

This abrasive sheet is designed for flap disc and wheel applications, suitable for polishing stainless steel, alloy, and carbon steel. It offers high polishing performance.

## Product Overview

### High-Performance Abrasive Solution

The AA80 abrasive sheet is specifically engineered for demanding metal grinding and polishing applications. Designed for use with flap discs and wheels, this abrasive provides consistent material removal and an extended operational lifespan. It is an ideal choice for professionals working with stainless steel, alloy, and carbon steel, ensuring high polishing performance and precision.

## Technical Specifications

### Primary Applications

- Metal Grinding
- Polishing
- Flap Disc Mounting
- Wheel Mounting

<b>Grit Size</b>	AA80
<b>Compatible Materials</b>	Stainless Steel, Alloy Steel, Carbon Steel
<b>Model Identifier</b>	KYZ563
