Product Overview

High-Performance Alkaline Power

These AAA alkaline batteries are engineered for reliable, long-lasting performance in a wide variety of electronic devices. With a nominal voltage of 1.5V and a robust chemistry system, they provide consistent energy output for household and professional equipment. Designed with advanced anti-leakage technology, these batteries ensure safety and durability for your critical electronics.

Technical Specifications

Nominal Voltage	1.5 V
Capacity	1200 mAh
Chemistry System	Zinc-MnO ₂ (Alkaline)
Shelf Life	5 Years

Physical Characteristics

Dimensions

10.5 mm
Diameter

44.5 mm
Height

Average Weight	12 g
Jacket Material	PVC or Aluminum Foil

Performance & Safety

Discharge Performance	>= 140 minutes (under 3.9 @esistance, 24h/d, 0.9V end voltage)
Defective Rate	50 PPM
Certifications	SGS, ROHS, REACH, KC, WERCS, MSDS, ISO9001, ISO14001
Product Liability Insurance	Up to \$2 billion coverage
