

# AAA Alkaline Battery (LR03/AM4)

AAA alkaline batteries are designed for optimal performance in digital devices. These batteries provide long-lasting power and reliable performance, making them suitable for a variety of applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Alkaline Power

These AAA Alkaline batteries (LR03/AM4) are engineered for extra-long life and reliable performance in demanding electronic devices. Designed to meet rigorous international standards, they deliver consistent power output suitable for both high-drain and everyday consumer electronics. With a proven track record of export quality to major global markets, these batteries are a dependable choice for professional sourcing requirements.

## Technical Specifications

Battery Type	Alkaline
Size Standard	AAA (LR03/AM4)
Voltage	1.5 V

## Performance Metrics

### Discharge Performance

<b>5.1 ©</b> Load Resistance	<b>4 hours</b> Duration (>)
---------------------------------	--------------------------------

Cut-off Voltage	0.8 V
-----------------	-------

## Applications

Recommended Applications	Toys, Remote Controls, Digital Cameras, Flashlights
--------------------------	---

## Quality Assurance

Export Markets  
USA • Europe
