Product Overview

High-Performance Alkaline Power

These AAA alkaline batteries are engineered for maximum reliability and consistent power output across both high and low-drain electronic devices. Featuring advanced D/I Can technology and a high-density cell structure, they offer significantly extended runtimes compared to standard heavy-duty batteries. With a focus on safety and sustainability, the design includes an improved sealing structure to prevent leakage and is fully compliant with major environmental protection standards.

Technical Specifications

Battery Size	AAA (LR03)
Nominal Voltage	1.5 V
Storage Life	10 Years

Features

Key Features

- Leak-proof sealing structure
- High-density cell technology
- Suitable for high and low drain devices
- 8x longer lasting than heavy duty batteries

Compliance & Sustainability

Material Composition

Mercury-free • Cadmium-free • Lead-free

Environmental Standards

Directive 2006/66/EC, Directive 94/62/EC
