Product Overview

Reliable Power for Everyday Electronics

This AAA-sized zinc-manganese battery is engineered to provide consistent 1.5V power for a wide range of portable electronic devices. Featuring a durable PVC jacket construction with metal top and bottom terminals, it is designed for safe and reliable operation. Ideal for common household electronics like remote controls, toys, and portable gadgets.

Technical Specifications

Battery Size	AAA (R03)
Nominal Voltage	1.5 V
Chemistry	Zinc-Manganese

Performance

Minimum Discharge Time

35 mins

Minimum Discharge

Construction

Casing Materials	PVC Jacket, Metal Top, Metal Bottom
------------------	-------------------------------------

Safety & Handling

Safety Warnings

- Do not recharge
- Do not destroy in fire
