Product Overview

High-Performance Lithium Power

The FR03 AAA lithium battery is engineered to deliver a stable 1.5V output, providing a reliable and long-lasting power solution for a wide range of electronic devices. Designed for performance in challenging conditions, these batteries operate efficiently across a broad temperature range from -30°C to 60°C. With a 10-year quality guarantee, they offer an ideal balance of durability, longevity, and consistent energy delivery for professional applications.

Technical Specifications

Operating Temperature

-30 °C

Min Temperature

60 °C

Max Temperature

Battery Type	Lithium
--------------	---------

Voltage	1.5 V
---------	-------

Commercial Terms

Minimum Order Quantity	20000 pcs
------------------------	-----------

Private Label Availability	Yes
----------------------------	-----

Quality & Compliance

Quality Guarantee	10 years
-------------------	----------

Certifications & Standards	BSCI, GSV, ISO9001, ISO14001, 2006/66/EC, MSDS, IEC, UN38.3
