Product Overview

High-Performance Ni-MH Power

These AAA Nickel-Metal Hydride rechargeable batteries offer a reliable and cost-effective power solution for a wide range of electronic devices. Designed with advanced technology, they provide over 1000 charge/discharge cycles and maintain excellent capacity even after storage. They are an environmentally friendly alternative to disposable batteries, suitable for telecommunications, lighting, and power tools.

Technical Specifications

Nominal Voltage	1.2 V
Rated Capacity	800 mAh
Battery Size	AAA

Performance Metrics

Cycle Life

1000 cycles

Charge/Discharge Cycles

Shelf Discharge Retention	Approx. 79% capacity after 1 month storage at 20°C
Overcharge Performance	Withstands continuous 0.1C rate overcharge for 48 hours without leakage or deformation

Applications

Suitable Applications	Telecommunications, Audio Devices, Video Devices, Lighting, Remote Control Toys, Power Tools
