

AAA Rechargeable Batteries

These AAA batteries are rechargeable, offering a cost-effective and environmentally conscious power solution. They deliver long-lasting power for various electronic devices and can be recharged multiple times.

Product Overview

High-Performance Rechargeable Power

These high-capacity rechargeable AAA batteries are engineered to provide long-lasting, reliable power for a wide range of electronic devices. Designed for efficiency and sustainability, they offer a cost-effective alternative to single-use batteries by supporting multiple recharge cycles. Perfect for daily use in remote controls, toys, and various small household electronics.

Technical Specifications

Rated Capacity

900 mAh

Capacity

Nominal Voltage

1.2 V

Battery Size

AAA (7÷)

Packaging & Usage

Key Benefits

Rechargeable • Cost-Effective • Environmentally Friendly
