

AAA Zinc Chloride Battery

AAA zinc chloride batteries are designed for general use. These 1.5V batteries provide reliable power for common low-drain devices.

Product Overview

Reliable Power for Everyday Devices

These AAA zinc chloride batteries are engineered for general-purpose applications, offering a consistent and reliable power source for low-drain household electronics. Designed with safety in mind, they are completely free of mercury and cadmium, aligning with modern environmental standards. Their 1.5V output makes them an ideal choice for everyday equipment such as remote controls, wall clocks, and various toys.

Technical Specifications

Performance Features

1.5 V
Nominal Voltage

Battery Size	AAA
Voltage	1.5 V
IEC Designation	R03P
JIS Designation	UM-4

Compliance and Safety

Environmental Compliance	Mercury Free, Cadmium Free
