

AAA Zinc-Manganese Dry Batteries, 1.5V

AAA zinc-manganese dry batteries are designed for general use in electronics. They come in cartons containing 1296 size 7 batteries.

Product Overview

General-Purpose AAA Power Solution

These AAA (Size 7) zinc-manganese dry batteries are designed for reliable, general-purpose use across a wide range of electronic devices. Engineered for consistent performance, they provide a standard 1.5V output suitable for common household and office equipment. This bulk packaging option is optimized for high-volume needs, ensuring efficient storage and distribution.

Technical Specifications

Battery Chemistry	Zinc-Manganese Dry Battery
Battery Size	AAA (Size 7 / R03)
Nominal Voltage	1.5 V

Packaging & Logistics

Packaging Details

Unit Level	Quantity
Batteries per box	48
Boxes per carton	27
Total batteries per carton	1296

Carton Dimensions

0.285 m Length	0.24 m Width	0.18 m Height
--------------------------	------------------------	-------------------------

Gross Weight per Carton	10.7 kg
Internal Arrangement	Two layers, back-to-back
