

Abrasive Blasting Cabinet for Surface Preparation

This abrasive blasting cabinet is designed for cleaning and surface preparation. It features a fully enclosed design with integrated dust collection and built-in gloves.

Product Overview

Compact Surface Preparation Solution

The SBC90 Sandblaster is a professional-grade abrasive blasting cabinet engineered for precision cleaning, deburring, and surface preparation. Its fully enclosed design incorporates integrated dust collection to maintain a clean and safe workshop environment during operation. Equipped with heavy-duty construction and built-in controls, this unit provides reliable performance for diverse applications ranging from automotive restoration to industrial metal fabrication.

Technical Specifications

Construction Material	Heavy-duty steel
Compatible Abrasive Media	Glass Beads, Aluminum Oxide, Silicon Carbide

Operational Features

Integrated Features

- Integrated dust collection system
- High-visibility clear viewing window
- Internal lighting for enhanced precision
- Built-in operator gloves for control

Key Applications

Automotive Restoration • Metal Fabrication • Part Deburring • Surface Cleaning
