

# Abrasive Blasting Cabinet SBC90C

This abrasive blasting cabinet is a compact and efficient system for cleaning and surface preparation. It features a fully enclosed workspace with integrated gloves and a viewing window for safe and controlled material processing.

## Product Overview

### Professional Abrasive Blasting Solution

The SBC90C is a robust and efficient abrasive blasting cabinet engineered for precision surface preparation. It features a fully enclosed workspace that ensures a safe environment while effectively removing rust, paint, scale, and contaminants from small to medium-sized parts. Built with heavy-duty steel and an integrated media recycling system, this cabinet is an essential tool for high-quality metalworking and automotive restoration tasks.

## Technical Specifications

Construction Material	Heavy-duty steel
Primary Applications	Automotive Restoration, Metalworking, Surface Cleaning, Scale Removal

## Key Features

### Core Features

- Fully enclosed workspace for safety
- Integrated glove ports for operator dexterity
- High-visibility viewing window
- Abrasive media recycling system

## Compliance & Standards

### Equipment Class

Industrial Grade • Compact Design
